Subject: Eureka Estates

Dear Rodney Allen and Bob Craig,

Property owner Danny Middleton and myself observed seven 8-foot profile holes on 6/11/04. The holes were observed at the request of Mr. Middleton who is looking to gain approval for land development of 20 lots, 3 to 8 acres each. In addition to these seven holes observed there have been 3-4 permits previously issued on land within this proposed development.

Based on these findings (attached, w/ map available upon request), and the size of the lots, this department does not anticipate any problems with a septic system permit being issued for each of the lots proposed. This letter is not intended to be a permit for construction, rather a preliminary assessment that there should not be a problem issuing permits once they are applied for.

Please feel free to call with any questions.

Sincerely,

Dan Hendershott, REHS
Senior Environmental Health Specialist
